the next wave in

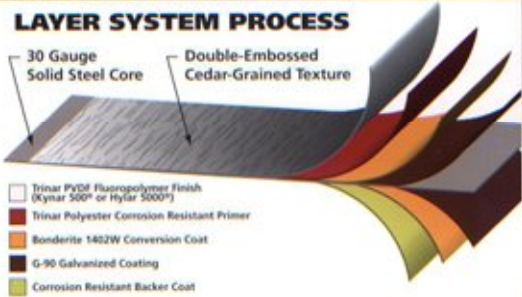

The beauty of traditional shingles — the strength and durability of steel.

ArrowLine's unique 4-way interlocking system withstands winds up to 160 mph, has the best hail rating available, and qualifies for lower insurance rates through some providers.

ArrowLine Permanent Metal Shingles are not just brute strength — they are available in 15 designer colors with matching trim for an aesthetic statement like none other.

ArrowLine THE PERMANENT METAL SHINGLE-SHAKE

ArrowLine Permanent Metal Shingles™ were developed for residential and light-commercial installations, for roofing or sidewall applications. EDICO's new generation steel products and high-performance coil coatings enable ArrowLine Metal Shingles to be a cost-effective choice, environmentally safe and easy to install.

It's more than just an ordinary shingle. Unlike traditional roofing products, ArrowLine Shingles will not warp, split, peel or crack. Our products have been successfully tested in winds in excess of 100 mph. They easily withstand frigid north woods winters as well as the blistering southern sun. Coated with a deluxe KYNAR 500® finish to maximize color retention, ArrowLine Shingles are available in a full range of 15 standard colors. The unique double embossing pattern adds panel strength that are strong enough to be walked on and can be applied over an existing roof, thereby reducing installation costs.

Arrowline Shingles have a unique 4-way locking system that allows them to be installed quickly and easily which helps keep labor costs to a minimum. This 4-way system locks out the harshest of weather conditions. Permanent and virtually maintenance-free, an ArrowLine roof will last for years to come without incurring typical upkeep expenses.

The next wave in lasting building materials should make ArrowLine your first choice for your project.

ArrowLine® Coordinating Colors

Coated with a deluxe KYNAR 500® finish to maximize color retention, ArrowLine Metal Shingles are available in a full range of standard colors.
